

Setting up a Gigaset Directory

March 2018 - Simon Duffy

Gigaset N300 and N510 bases both support various directory types - Online Directories, Corporate Directory and a local directory upload. Corporate is only available in the N510 and we won't discuss this or the Online Directories. We will deal with the upload of a local directory of contacts.

- 1. The first thing that you need to do is to log into the base itself either use the url <u>www.gigaset-config.com</u> to find it or browse to the ip address.
- 2. Log into that and then go to the settings tab, then click on Directories on the left hand side and you will see all the options that are available for Directories.

Home	Settings	Status				Log off
Network	Public C	Online Directories				?
Telephony Messaging			You can select the onl handset.	ine directories of sever	al providers to be displayed	on the
Info Services			Provider	Select		
Directories			DE - klickTel			
Online Directory Corporate Directory Directory Transfer			CH - tel.search.ch	•		
Management	Setting	s for an additional Provider	Add			
	Automatic	look-up of caller's name	Deactivated			
			Set	Cancel		

- 3. Click on Directory Transfer and you will see something like below. In this example I have two handsets on one base.
- 4. So the first stage is to get your csv file of contacts split into two columns. One will be the name and one will be the number. Convert this to vcard using some suitable software. Vcard is like the old mobile phone format. You will have a file with the extension .vcf
- 5. So the first thing that we do is choose the device you are uploading to using the radio button, in the example below I have chosen the handset 600. Click on browse button to find the .vcf file. Then click on Transfer to upload the directory to the handset.

Home	Settings	Status	Log off
Network Telephony	Expo	t and import local directories	?
Messaging Info Services		Mohila davica:	Please select a device for exporting or importing its directory to or from PC.
Directories Online Directory Corporate Directory			 600 300
Directory Transfer	Na	me of directory file:	Browse
Management	Transfer o	lirectory from PC to handset:	Transfer
	Sa	ve directory on PC:	Save
	D	elete mobile device directory:	Delete

6. If the transfer was successful you will get a message similar to the one below.

192.168.1.62 says	
3 of 3 directory entries transferred.	
	ОК

7. If you look on the handset and click on the relevant directory button then you will see your phonebook will be populated now.
